THE CAMBER LENS

Camber lenses are the **state-of-the-art** in progressive lenses. The technology incorporated in these progressive lenses represents a **completely revolutionary** concept. The Camber lens blank has a **unique front surface with a variable base curve**, which means the power of the front surface increases continuously from top to bottom.

This provides the **ideal base curve for all visual areas** while **reducing oblique aberrations** in the lens. Thanks to the unique function of its front surface, all Camber finished lenses offer **unbeatable vision quality at any distance, especially in the near zone.**
